PROJECTS

TetraSki Calibration Project - C#, .NET Maui

Current Project

- Developing a calibration application that connects to a Low-Energy Bluetooth Device (ANR Corp M40 Sensor), receives inputs from the device, reduces noise, and determines an appropriate threshold to determine when a voluntary muscle contraction from a user has occurred.
- Outputs from the application will be used as inputs to the TetraSki adaptive ski chair to allow users to use voluntary muscle contraction to direct the ski as they go down the mountain.

MSDscript Project - C++, QT Creator - [Portfolio Page](#)

Jan '24-Apr '24

- Developed an interpreter called MSDscript, a Domain-Specific Language that supports numeric operations, variables, boolean expressions, conditional statements, and function definitions.
- The app parses input strings into expression objects, evaluates them, and performs operations accordingly. In addition, I created a user interface to make interacting with the application simpler for the user.

Additional Projects - See [Portfolio Website](#)
